

GridTracker v1.24.0907

An Amateur Radio Companion

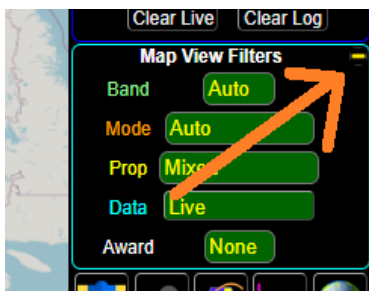

September 7th, 2024

Notes

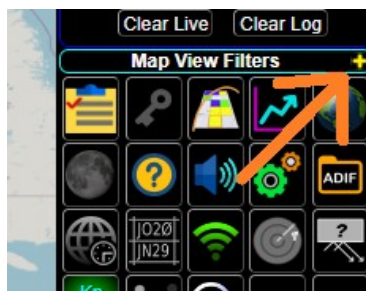

I replaced the “Conditions” button image with a near real-time Planetary K-Index (**Kp**). It updates every 5 minutes with the last 5 minute *observed* **Kp**. It is not a forecast value. The background changes color depending on the severity of the **Kp**. Clicking the button still opens the hamqsl.com conditions & solar images window.

Map View Filters can now be hidden/minimized, giving more room for those with smaller desktops.

k

6 character Maidenhead locators aka MH6 is now only available in Pin mode. We have received way too many support issues where users have entered into MH6 and “lost” all their grids not knowing that they were still there, just **small**. Unfortunately, this caused a shift in the button positions when in Grid mode.

Change Log

- Main - Conditions button now planetary K-index (5 minute update)
- Main - Map View Filters can now be hidden
- Main - Fixed Prediction button not returning when going online
- Map - All Grid Overlay field boundaries are bolder
- Map - 6 character Maidenhead locators only supported in Pin mode
- Map - Fixed zoom factor bug causing slow and blurred rendering
- Map - Updated timezone data (corrects America/Mexico_City and others)
- Settings - Proper map selections when in offline mode
- System - Missing translations for Spanish and German fixed
- System - Map engine OpenLayers updated to v10.1.0
- System - BIGCTY update from September 5th
- Call Roster - Fixed ignored grids not saving on exit
